Hello John

Looking at our orders sent to you it would appear that you had 100 x 20kg of Equilibra in October 2005 and subsequently 60 x 16kgs of Equilibra 500 in January/February 2008. We introduced Equilibra 500 in 16kg bags in December 2004 and I seem to remember that you kept it in 20kg bags for the October 2005 order [REDACTED]

[REDACTED]

You took your first order of Equilibra @ the end of 2003 and after that in August 04, so that would tie in with the next order a year later in Oct. 05. I am sure that the 05 order was Equilibra 500.

I hope that helps.

Best regards

Steve

Steve:

Thanks for your email. Obviously, I have been sending emails for the past 6 weeks to the incorrect address. Rather than send them all, because they have the same end point, I am just forwarding the last. It would be extremely helpful for us to know when you introduced Equilibra 500 (some time in 2005?) and when we first received it.

Regards,

John

**Subject:** URGENT

Dear Steve:

We're trying to track a long-term feeding program at Freedom Farm. In sorting out my office last weekend, I came across a brochure for Equilibra 500: it states "Up to 500% more nutrient absorption".

As you know, the farm's full name is "Freedom Farm Equestrian Research & Development Facility". It is where we carry out all our research, for equipment and nutrition studies with SUCCEED.

I realize we must have changed from the original Equilibra to Equilibra 500. I just do not know when (since I just copy a prior order from my computer and send it on to you, and I have lost old invoices), and we're attempting to correlate some long-term results.

Can you please, please tell me when you introduced Equilibra 500 and when our first shipments might have arrived?

Regards,

John Hall
